

### COMPACT

**Sensors:** Rain, Temperature, Humidity

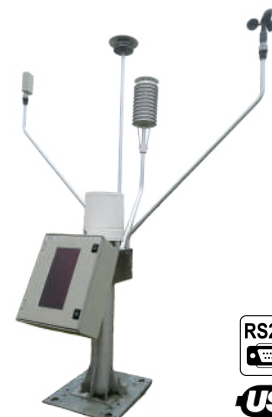

### EVOLUTIVE

**Up to 10 Sensors:** Pluviometer, Anemometer, Vane, Pyranometer, Rain, Temperature, Humidity, Pressure + Options

### SELECTIVE

GPRS

GSM

Radio

**Up to 20 sensors**

Full autonomy with solar panel

## BENEFITS

Robust design adapted for harsh conditions in remote locations

Local data & customized actions

Powerful data management for large operational network

Ecological & economic impact

Data collection

1

Weather measurements

2

Data processing & Smart algorithms

3

Monitoring & Modeling

4

Decision support for the field plot

5
