

EXPLORE THE CLIMATE

CE318-T

Sun Sky Lunar Multispectral Photometer

The CE318 is the reference for automatic multispectral atmospheric photometry. Developed for the NASA in 1992, it was constantly improved to meet the growing requirements of AERONET (AErosol RObotic NETwork), the worldwide federation of networks dedicated to the measurement of atmospheric aerosols and federated by the NASA. Other independent networks like SKYNET, CARSNET, and SONET also operate CE318 photometers.

The latest version, the CE318-T, takes advantage of cutting-edge technologies to improve metrological performance and facilitate operations. AERONET decided in 2015, after full validation, to accept only the CE318-T for new photometers entering the network.

The CE318-T performs sun, sky and lunar light measurements, for the retrieval of essential physico-optical parameters: Aerosol Optical Depth (AOD), Volume Size Distribution (VSD), complex refractive index (n), shape factor, water vapor content.

The high sensitivity tracking, detection chain and internal data processing result in enhanced measurements. Flexible communication and solar autonomy allow easy operation both on fixed sites and temporary locations.

Features

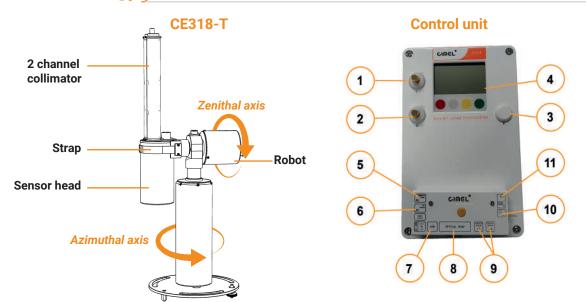

- Full autonomy with low power consumption (5 W solar panel)
- Day-time (SUN/SKY) & night-time (MOON: from 1st to last quarter) measurements:
 - > AOD, VSD, n, water vapor
- Several models according to the application:
 - > Standard, polarized, BRDF, BPDF, SeaPRISM (Ocean & Lake Color)
- High accuracy & long-term stability
- Flexible communication: RS232, USB, cellular modem
- AERONET compatible: fully automated & homogeneous data processing
- Secured data storage (on SD card)

Applications

- Aerosol quantification (AOD)
- Satellite calibration & data validation
- · Climate research
- Atmospheric analysis
- · Site validation of solar power plants
- Air quality

Technology

Communication & interface

- 1: GPS antenna
- 2: Cellular modem antenna
- 3: Short range radio antenna
- 4: Display (touch buttons)

Removable terminal block

- 5: Pyranometer input
- 6: Rain detector
- 7: USB
- 8: Sensor head
- 9: Robot (azimuthal & zenithal)
- 10: Solar panel
- 11: External battery

Technical specifications)

Sensor Head

| Full scale digital count precision | < 0.1% |
|---------------------------------------------------------------|---------------------------------------------------------------------------|
| Half field of view | 0.63° |
| Smallest scattering angle (from the sun) for sky measurements | 2° |
| Spectral range | Si detector: from 340 to 1020 nm InGaAs detector: from 1020 to 1640 nm |
| Long term drift of single band filters' transmission rate | < 1% / year |

Control Unit

| Firmware | Compatible with all photometer models & all available scenarios |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Data coding (measurements recording) | 32 bits |
| User interface | - Touch keyboard - Backlight graphic display |
| Input & output connectors | On a single removable terminal block |
| Communication outputs | RS232, USB, Hexa-Band (UMTS/3G/W-CDMA), Quad-Band (GPRS) |
| Storage | Flash memory (4 MB): 6 to 8 weeks data storage, for automatic transfers SD card (32 GB): virtually unlimited capacity security for manual retrieval |
| Additional measurements | Rain detector, GPS, Barometer, Temperature & Humidity sensors (inside of the protection enclosure) |
| Additional input | Thermopile pyranometer (not supplied) |
| Monitoring Software PhotoGetData | Instruments setup, wavelengths selection, scan modes & scenarios configuration, measurement scheduling, data analysis, data visualization, data storage (raw data, k8, ASCII files) |

Robot

| Azimuth range | 0° - 360° |
|----------------------------------------------------------|-----------|
| Zenith range | 0° - 180° |
| Resolution / tracking precision | 0.003° |
| Sun / Moon tracking accuracy (automatic active tracking) | 0.01° |

Photometer models

| Reference | Description | Available bands |
|---------------------------------------------|----------------------------------------------------------------|-------------------------------------------------------------------------------------|
| CE318-TS9 | Standard model | 340, 380, 440, 500, 675, 870, 937, 1020, 1640 nm |
| CE318-TP9 | Polarized model | 340, 380, 440, 500, 675, 870, 937, 1020, 1640 nm / Polarization in three directions |
| CE318-TU9 | BRDF measurements (9 filters) | 380, 440, 550, 675, 740, 870, 937, 1020, 1640 nm |
| CE318-TU12 | BRDF measurements (12 filters) | 415, 440, 490, 555, 675, 702, 740, 782, 870, 937, 1020, 1640 nm |
| CE318-TV12-OC (SeaPRISM for Ocean Color) | Measurement of radiances emerging from sea water surface | 400, 412.5, 442.5, 490, 510, 560, 620, 665, 779, 865, 937, 1020 nm |
| CE318-TV12-LC (SeaPRISM for Lake Color) | Measurement of radiances emerging from lake water surface | 412.5, 442.5, 490, 510, 560, 620, 665, 681, 709, 865, 937, 1020 nm |

Options

| Reference | Description | Characteristics |
|---------------|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| 12 m cabling | 12 m cable connecting the photometer head to the acquisition unit | - Male side: Type DB15 - Female side: Jupiter type with 22 pins |
| 15 m cabling | PC line kit for 15 m cabling length | - 15 m RS232 cord - RS232 - USB converter |
| 100 m cabling | PC line kit for cabling length up to 100 m | - RS232 connection kit - 100 m special cable (tube cut to length) - RS232 - USB converter |

Environmental conditions

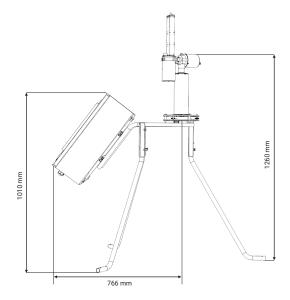

| Temperature range | -20°C to 50°C |
|-------------------|---------------------------------------|
| Humidity range | 0 to 100% RH (in non-icing condtions) |

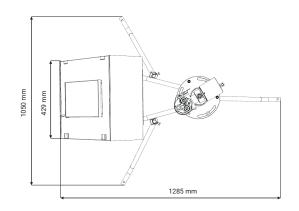

Power

| Power supply | Power adapter (110 - 240 V) |
|--------------------|--------------------------------------------------------------------------|
| Solar panel | 5 W solar panel embedded in the protection enclosure of the control unit |
| Batteries (backup) | 2 batteries 6 V / 8.0 Ah in series |

Mechanical Specifications

| Infrastructure | Tripod, with protection enclosure |
|------------------------|------------------------------------------------------------------|
| Packaging | Flycase for transportation |
| Dimensions (H x W x D) | - Flycase box: 66 x 52 x 47 cm - Tripod box: 103 x 57 x 60 cm |
| Gross weight | - Flycase box: 30 kg - Tripod box: 21 kg |
